DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically, term “capable of “ is indefinite and does not have any patentable meaning.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1773

4. Claims 1-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP'088.

The applied EP'088 reference teaches that it is well known in the art to make and use coatings having a compositions substantially as claimed. See page 4, lines 15-59. The EP'088 reference does not specifically name a binding agent. However, it would have been obvious to one having ordinary skill in the art at the time of the invention to select compounds that would physically and chemically bind elements of the composition, since such would improve physical and mechanical properties of the laminate.

The amendments and remarks submitted by Applicants in their response have been fully considered. The arguments have not been persuasive. The examiner believes that the rejections are still proper and are maintained.
